ULTIMATE SPEED

The HighLine Series is built using our FLY LITE neoprene that provides not only 40% more stretch compared to neoprene 3.0, but makes it our lightest neoprene fabric yet.

The inner and Seal seam treatment is strategically placed throughout the suit to provide the lightest seam sealing technology possible. Zipperless design eliminates the weight and bulk of a zipper zip system. The HighLine Series is built down our lightest, most flexible, performance driven neoprene available.

**Celebrate the past.
Innovate the future.
Live in the now.**

Quiksilver has been embodying that philosophy for 50 years – but we're not defined by a number.

We're defined by moments. Because all it takes is one single moment to define a generation, lure us into a life-changing adventure or re-write the rules of tomorrow. And all we are today is 50 years of now.

Generations of 

Australia

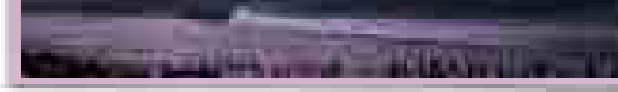

It all started with a pair of boardshorts. Quiksilver was born 50 years ago in a garage in Torquay, Australia, when John Law and Alan Green's vision came to life in the form of fabric. They wanted to build a boardshort that enhanced the surfing experience. The goal was simple, but the result was incredible.

That first pair of boardshorts changed everything.

To celebrate our 50th anniversary, we revisited the place where it all began. This line is inspired by Australia, the sensations of summer, and the radically simple vision of '69.

HIGHLITE

**LIGHTER, DRYER,
MORE FLEXIBLE**

Quiksilver's Highlite fabric is driven by comfort. The fine weave construction utilises semi perforated channels to enhance fabric breathability and reduce dry time. This light weight, high-grade stretch fabric provides seamless coverage for rash-free surfing.

Quiksilver Highlite素材の最重要ファクターは快適性。この生地は、特殊な折り組織の二重構造で最も必要なポイントで素材の通気性と柔軟性を高めています。超軽量レイヤーが内側の膜の役目を果たし、完全なラッシュフリーサーフィンを実現します。

QUIK DRY TOWEL

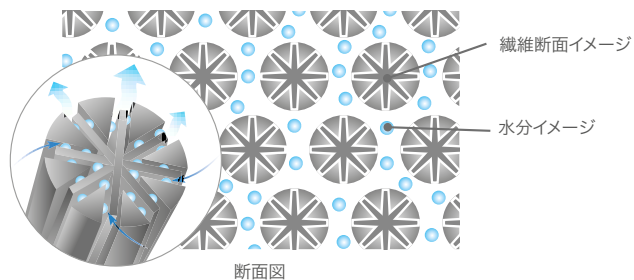

吸水速乾に優れたマイクロファイバーを使用したQUIK DRY TOWELが
継続してリリース!

[TOWEL]

MICROFIBER

毛髪の1/100の超極細繊維の三角断面に水が染み込むことで、優れた吸水性を持ち、その吸水力・吸水量は綿よりも優れている。更に表面積が多いため取り込まれた水分が拡散しやすく、その速乾性も綿素材の倍の効果が期待できる。また、肌触りもふんわりとした天然繊維のように柔らかく使い心地がいい点も特徴。
